- Glass Door Design
- Rating 3-Star
- Fastest Cooling
- Clean back covered area
- Nano Healthcare Technology
- Toughened Glass Shelf
- Wide Voltage Design
- 10 years Compressor warranty

**Capacity : 193 Litres**

# Air-Conditioner

**GET COOL | CLEAN | CRISP AIR**

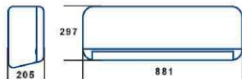

## -20°C~60°C Run and comfortable

With the leading two-stage compression (EVI) and cooling system optimization technology and high reliable unit components to ensure the reliable operation even in extreme ambient temperature( heating at -20°C,cooling at 60°C)

Size:mm(12k)

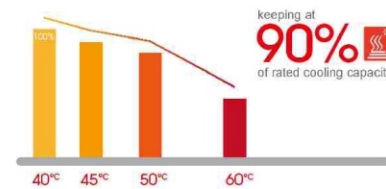

### Matte finish panel

With full frosted appearance and satin design, which makes the machine high-end with elegance. Through thousands of tests, we choose the best material solution to make the frosted body and also keep a great cleaning capability.

## Low Cooling Capacity Loss

Under the extreme heat conditions,cooling performance of the unit will not decrease too much,keeping at 90% of rated cooling capacity.

## Safe·Reliable

## Quick Cooling/Heating

Fast Cooling around 30s / Powerful heating within 1min  
Provide comfort in time.

**30s**  
Quick Cooling

**60s**  
Quick Heating

- Quick cooling and heating technology
- The rotating speed of compressor can reach 3900 r/min in 30 seconds.
- The start-up time was shortened via the quick driving of refrigerant operation

### Demountable Underjaw

Patent

Installation engineers decreased from 2 or 3 to 1

Engineer to 1

Installation time reduced by half

### Fins- design air louver

Patent

Less air resistance, 10% longer air supply distance

### 5VA security controller box

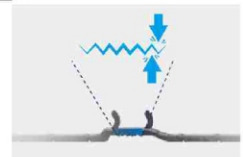

The highest level of fire-proof materials are adopted to protect the internal electronic control components, and prevent fire due to internal and external factors upon an accident.

### Wave position buckle

Patent

Reliable and precise air supply.

### WFluoride leakage protection

Patent

It can monitor the leakage of Freon. When leakage occurs, the control system will immediately shut down so as to protect core components such as compressors from damage

## Blue fin

It allows the refrigerant to transfer better heat and increases the cooling capacity of the Air Conditioner. This has the epoxy coating on the coils which protects them from water droplets, accumulation of salt, and deposition of acid.

# Washing Machine

Fully Automatic &  
Semi-Automatic  
**Washing Machines**

## WATER MAGIC CUBE

The Specially designed pulsator of the Midea water Magic Cube generates a multi-directional water flow, which passes through the fabric smoothly, giving you tangle-free clothes and a superior wash quality.

Magic Cube Pulsator

**JET SPRAY CURRENT**  
Ensures uniform washing for all the clothes in the drum.

**ROTATING CURRENT**  
Detangles the clothes by lifting them from the bottom of the drum and dispensing them in all directions.

**SURF CURRENT**  
Spins the clothes in up and down motion, thereby improving the wash quality of your clothes.

### Lint Filter

Its advanced filter prevents detergent and lint build-up on clothes by collecting all the residue, which can be manually removed later.

### Air Jet

A unique designed lid which ensures that there is a greater flow of air for quicker drying of clothes.

### Transparent Lid

The Transparent Lid makes it convenient to check the status of the laundry at any time.

### RUST FREE BODY

Its ultra-durable plastic cabinet will never rust, resulting in a significantly longer life span.

### Soak

According to the degree of dirt in the fabric, different soaking times may be selected. The clothes are soaked thoroughly so that detergent seeps into the fabric and removes tough stains.

## 3D Aqua Storm

A 3-dimensional water flow creates multi-directional water currents to ensure deep cleaning of clothes and removes dirt and detergent residue efficiently.

### Magic Filter

Its advanced filter prevents detergent and lint build-up on clothes by collecting all the residue, which can be manually removed later.

### Air Jet

A unique designed lid which ensures that there is a greater flow of air for quicker drying of clothes.

### 3 in 1 Safety

The Midea semi-automatic washing machines are equipped with three safety mechanisms. A molded plug with safety fuse which protects the machine from high voltage fluctuations.

### 3 in 1 Safety

According to the degree of dirt in the fabric, different soaking times may be selected. The clothes are soaked thoroughly so that detergent seeps into the fabric and removes tough stains.

### Transparent Lid

The Transparent Lid makes it convenient to check the status of the laundry at any time.

### Dual Layer Durable Body

Solid and durable double layered outer body for withstanding heavy load.
